

BARBARY COAST NEIGHBORHOOD ASSOCIATION

Port of San Francisco's Waterfront Resilience Program Open House

June 16 5:30-7:30

Ferry Building Grand Hall

Join BCNA and your Embarcadero neighbors for a community open house hosted by the Port of San Francisco to discuss the Downtown Coastal Resilience Project.

The Downtown Coastal Resilience Project is proposing to build new coastal defenses, expand waterfront open spaces, implement nature-based shoreline features, and improve seismic safety in one of the most flood-vulnerable areas along the Embarcadero between Broadway and Harrison Streets. This area experiences flooding during King Tides and extreme storms. The project also is designed to safeguard critical assets, including BART, Muni, sewer systems, downtown businesses, and historic buildings.

Your input on this massive project is critical! Come and make sure you learn all the details about how it will impact and protect your neighborhood in the coming years.

Please use this link to obtain your free Eventbrite tickets, save your spot and receive email reminders.
